

Engineering Technology Careers and Pathways in Ontario

Help your students discover careers, paths and opportunities available in engineering and applied science technology.

Gamified Engineering technology career pathway modules are now freely available on the ChatterHigh platform.

The gamified modules by the Ontario Association of Certified Engineering Technicians and Technologists (OACETT) will guide students through the careers, paths and opportunities available in engineering and applied science technology. Students will learn how different groups of people and professionals work together while earning points that they can use to enter a draw or donate to Food Banks Canada.

In these modules, students will cover the following topics:

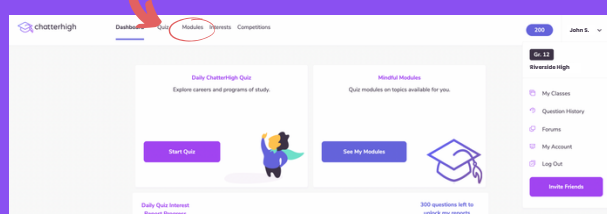

- What is Engineering Technology
- What is OACETT
- How OACETT Benefits Students
- Pathways in Engineering Technology
- Careers as an Engineering Technician
- Careers as an Engineering Technologist
- Opportunities and Advancements in OACETT

Getting Started is Fast and Easy!

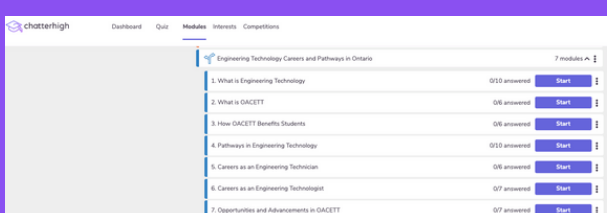

1

Visit chatterhigh.com and create an account.

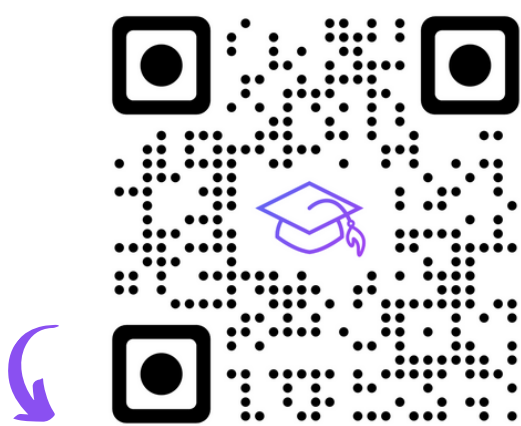

2

After verifying the account, login and navigate to 'Modules'.

3

Choose *Engineering Technology Careers and Pathways in Ontario* and start quizzing!

What Students Experience Within Our Module

Through ChatterHigh's 'search and find' design, students can:

- Understand careers, paths and opportunities available in engineering and applied science technology.
- Benefit from the gamification aspect of earning points which can be donated to charity or used to enter prize draws.
- Explore strategies to develop their education and career plan.
